Education

SRM Institute of Science and Technology

Vadapalani, Chennai

Bachelor of Technology in Computer Science and Business Systems

2021 – 2025

– CGPA: 8.3/10.0

Velammal Vidhyashram

Surapet (CBSE)

12th Grade – 78%

2020

Velammal Vidhyashram

Surapet (CBSE)

10th Grade – 72%

2018

Experience

Program Tester (Gen AI Intern)

April 2025 – May 2025

Evolve Robot Lab

Chennai, TN

- Developed and fine-tuned a Generative AI model for high-accuracy text summarization tasks.
- Implemented and evaluated machine learning classification models using Python and Scikit-learn.
- Gained hands-on experience in full ML lifecycle including data preprocessing, training, and evaluation.

Support Intern

August 2025 – September 2025

CPCL (Chennai Petroleum Corporation Limited)

Chennai, TN

- Maintained critical IT infrastructure and monitored refinery systems to ensure system uptime.
- Resolved hardware and network issues and documented system workflows with technical team.

Projects

E-Commerce Microservices System | *Java, Spring Boot, Spring Cloud, Eureka, Config Server, API Gateway, MySQL*

- Engineered a scalable microservices architecture using Java and Spring Boot, establishing independent, loosely-coupled domains for User, Order, and Payment workflows.
- Implemented dynamic service discovery using Netflix Eureka and configured central routing via Spring Cloud Gateway to efficiently manage and secure client traffic.
- Developed an externalized, environment-specific configurations ecosystem using Spring Cloud Config Server to ensure smooth application transitions.
- Designed and integrated RESTful APIs leveraging Spring Data JPA, Hibernate, and DTO-based communication to enable efficient, normalized MySQL database operations.
- Utilized Maven for dependency management across modular services, demonstrating core cloud-native development practices, service scalability, and fault isolation.

RESTful User Management System | *Java, Spring Boot, Spring Web, MySQL, JPA, Swagger UI, MVC, REST API*

- Developed a Spring Boot web application for user data management featuring robust RESTful APIs for CRUD.
- Designed a detailed ER Diagram to map user relationships and implemented the MVC Architecture for logic.
- Integrated Spring Data JPA for persistence with a MySQL database, handling complex nested JSON structures.
- Automated API documentation using Swagger UI, enabling real-time endpoint testing and response validation.
- Reduced boilerplate code by utilizing Lombok and implemented password-based login validation logic.

Technical Skills

Languages: Java, Python, SQL (MySQL), JavaScript, HTML5, CSS3

Frameworks: Spring, Spring Boot (Web, JPA, JDBC, Actuator, Cloud, Eureka, Security)

Tools: Swagger UI, Postman, Spring Tool Suite, IntelliJ IDEA, VS Code, MySQL Workbench, Maven

Core Competencies: RESTful API Design, Microservices Architecture, Service Discovery, MVC, Database Normalization
